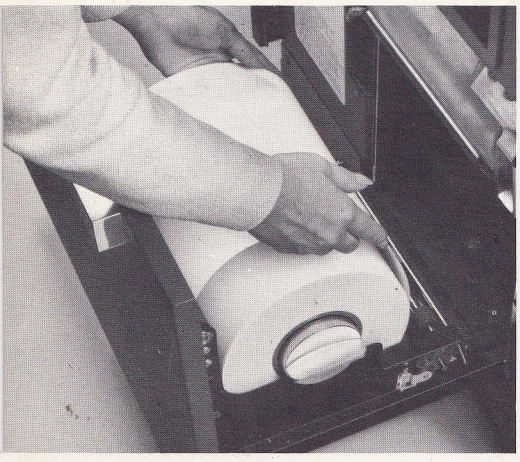
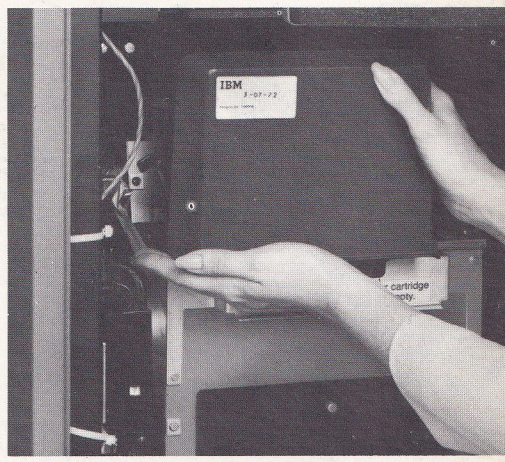
IBM

The IBM Copier

The IBM Copier

So easy and economical to use and maintain. It can be relied on for excellent performance and long, dependable service.





Reliable Performance.
Dependability is engineered into every IBM Copier so you can rely on it when you need it. Roll paper feeding and a heating element that prevents moisture build-up keep IBM copiers virtually jam free.

Consistent Copy Quality.
The self-advancing photoconductor consistently produces clean, legible copies. Copies are made on plain bond paper that's easy to file, handle and write on. The Copier's raised letter reproduction gives copies the look and feel of the original.

Easy to Operate.
Simplicity itself. Just place the original, select the number of copies and push the start bar. Seconds later out come the copies. After the copy cycle the cover automatically pops up reminding you to take your original. The copy selector dial is self decrementing. It moves back to 1 after copies are made so the next user can't accidentally make too many copies.

Convenience.
You can locate an IBM Copier conveniently close to the work flow. The compact console has a 2′ X 3′ base with a functional 40″ counter height. It works quietly and operates on a standard 115 volt outlet.

Economy.
The IBM pricing plan helps you keep copying costs under control. You don't pay for copying above a fixed level, no matter how much more you use the machine. You know beforehand just what the limits of your copying costs will be.

Easy Maintenance.
The copier requires minimal care. There's less paper handling with the large, easy to install paper roll. With roll feeding you don't have to stop the machine or change paper to change paper size. You switch from letter to legal size and back just by pushing a button. The clean, compact, snap-in toner cartridge needs no attention during its long copy life.

Fast Service.
Should you need assistance you get it fast. Expert IBM service is always just a phone call away.

Specifications:
Operates on a grounded electrical outlet—115 Volt 15 Amp. dedicated line.
Floor standing console: 40″ high, 41″ wide, 25″ deep.
Prints 10 copies per minute.
Flat bed—moving: 14″ X 17″ maximum document size, 8½″ X 14″ maximum image area, 1″ maximum thickness.
Color: Charcoal with pearl-white top.
Approximate Net Weight: 665 pounds.
No warm-up time.
Uses bond paper on a roll. Available in IBM General Copy Bond or IBM Watermark Copy Bond.
Toner comes in compact cartridge, 1½ pounds.
